

BoNtA 568® DAILY CARE

ANTI AGING,
RELAXING,
REFILLING

Indications

BoNtA 568® Daily Care is a dermocosmetic serum for daily use, especially recommended as an anti-aging complement. It helps maintain the skin relaxed and smooth for a long time.

Properties

Prolonged smoothing:

BoNtA 568® Daily Care with β -tox prolongator, is a synergic association and high concentration of 3 polypeptides (pentapeptide, hexapeptide, octapeptide) which helps smooth wrinkles due to repeated contractions of facial muscles for a long time.

Filling and anti-aging effect:

BoNtA 568® Daily Care also helps reduce length and depth of facial wrinkles through the plumping out effect of Hyaluronic Acid (sodium Hyaluronate), a natural skin component which helps maintain internal skin hydration lost over the years.

Instructions for use

Apply BoNtA 568® Daily Care once or twice a day on clean dry skin on selected areas or the entire face, lightly massaging to facilitate penetration. It can be used continuously, visibly improving results.
