containing 5 ml (0,175 Fl.oz.)

## Indications

Dermal implant + biorevitalization  
Anti Aging meso treatments  
Superficial fine Wrinkles  
Skin Flaccidity & Dehydration  
**No limit of age\***

**RRS® HA Injectable must be used under appropriate aseptic conditions in an authorized clinic on healthy, disinfected skin.**

### Before the treatment

Before the treatment, the physician should inform the patient:  
- about indications and effects  
- the possibilities of the side effects (pain, redness, ecchymosis, stinging sensations and swelling, local inflammation, usually disappearing in 24 hours)  
- check allergy test

Sensitive skins may benefit from application of an anaesthetic cream prior to the treatment

We recommend to have a consent signed by the patient.

### After the treatment

Avoid extreme temperatures  
Saunas - Hammam  
Direct exposure to sun or UV  
From next day make-up can be used

### Contraindications:

Allergy to any of the ingredients. Patients presenting any skin alteration, skin disease, infections or sequelae of streptococcal infections. Patients taking immunosuppressants, undergoing cortical therapy, with autoimmune disease history, patients with uncompensated diabetes, acute joint rheumatics, repetitive angina, and endocarditis.

\*No studies are available for use during pregnancy and breastfeeding or in case of treatment on children or minors under 18.
